Connect to the Internet

Get online using your phone's data connection or Wi-Fi.

Using a data connection

It's simple. When you turn your phone on for the first time, it should connect automatically to your mobile operator's data service.

Using Wi-Fi

1. From the Home Screen, slide the **Notifications** panel open.
2. Tap Settings.
3. Tap the **Wi-Fi On/Off** switch to turn Wi-Fi on.
4. Tap **Wi-Fi**. A list of detected Wi-Fi networks will be listed.
5. Select the network you want to connect to.
   - If the wireless network that you want is not listed, tap **Menu** > **Add network.**
   - If you selected a secured network, you'll be asked to enter the network key or password.
   - If you selected an open network, you will automatically be connected to the network.

Surf the Web

1. From the Home screen, tap **All Apps**.
2. From the App menu, tap the **Internet icon**.
3. On the browser screen, tap the **URL field**.
4. Enter the web page address using the keyboard. As you enter the address, matching web page addresses will appear on the screen.
5. Tap an address to go directly to that web page or continue entering the web page address.
6. The web page you selected is displayed.

Customize phone appearance

Changing the wallpaper

You can personalize your phone with any of the available wallpapers.

1. From the Home screen, slide the **Notifications** panel open.
2. Tap Settings.
3. Tap **Personalize.**
4. From the display tab, tap **Wallpaper.**
5. Tap **Gallery** to choose an existing photo and crop it.
6. Tap **HTC wallpapers** to choose a preset wallpaper, and then tap **Apply**.

Adding Widgets

Some widgets are already added to your Home Screen for your convenience. You can add more from the available selections of widgets.

1. Press and hold on an empty space on your **Home Screen**. This will open up the Widgets tab.
2. From the Widgets tab, tap the **All Widgets dropdown** to display the list of widgets. Choose the widget you want added to your Home Screen.
3. Drag your selected widget to the Home Screen thumbnail you want the widget added to.
4. The new widget appears on the Home Screen you selected.

Play Store

Play Store is the place to go to find a variety of free and paid apps for your phone.

You need to have a Gmail account to access Google Play. The first time you access Google Play, you have to accept the Google Play Terms of Service.

1. From the Home Screen, tap **Play Store**.
2. Browse or search for an app.
3. Tap an app that you like.
4. Read the app's description and reviews to make sure the app is compatible with your phone.
5. To download the app, tap **Install** or **Download** (for free apps) or the price shown below **Buy** (for paid apps).
6. If you agree to the conditions, tap **Accept & Download** to begin the download.
   If you chose a paid app, you'll be redirected to the Google Checkout™ screen.

Set up Bluetooth

You can listen to music over a Bluetooth stereo headset, or have hands-free conversations using a compatible Bluetooth headset or car kit. The procedure is the same for both features.

1. From the Home screen, slide the **Notifications** panel open.
2. Tap **Settings**.
3. Tap the Bluetooth **On/Off** switch to turn Bluetooth on or off.
4. Tap **Bluetooth.** The Bluetooth screen will open. Your phone will start to scan for Bluetooth devices within range.
5. If you don't see your headset listed, tap **Menu** > **Search for devices** to refresh the list.
   *Make sure the headset is discoverable, so that your phone can find the headset. Refer to the instructions that came with the headset to find out how to set it in discoverable mode.
6. When you see the name of your headset displayed in the Available devices section, tap the name of the device. Your phone will automatically try to pair with the headset.
   *If automatic pairing fails, enter the passcode supplied with your headset.

Your Navigator Deluxe

With Your Navigator Deluxe, get all of the features of an advanced car navigation system on your mobile phone with voice turn-by-turn navigation enabled by GPS. Search for any destination including gas stations, ATMs, restaurants, and more. Get detailed maps of any location.

First things first

In order to use Your Navigator Deluxe, you must first turn on your phone's location and GPS settings.

1. From the Applications menu, tap **Your Navigator Deluxe**.

What you can do in Your Navigator Deluxe

- **Drive To:** Get turn-by-turn directions to an address, airport, contact's address and more.
- **Places:** Search for nearby businesses, the cheapest gas prices and more.
- **Maps & Traffic:** See where you currently are located on a map and what traffic is in the area.

Beats by Dr. Dre Audio™

Beats Audio™ integration gives you a rich, authentic sound experience, whether you're listening to music, watching a YouTube® video, or playing a game.

Dropbox Integration

Always have access to your photos, videos, and documents anywhere by storing them in Dropbox. When you sign in to your Dropbox account from HTC One V, you can even get an additional 23GB of free Dropbox storage for two years.

* If the Dropbox app is not preloaded, you can download it from Google Play.

1. From the Home screen, slide the **Notifications** panel open.
2. Tap **Settings**.
3. Tap **Accounts & sync**.
4. Tap + > **Dropbox**.
5. Follow the onscreen instructions to create or sign in to your account.
6. On your computer, go to the Dropbox website (www.dropbox.com), log in to your account, and complete the getting started steps.

Your **HTC** One V

Want some guidance on using your phone?
Go to www.htc.com/help/. You'll find how-tos, the user guide, videos, FAQs, latest news, and more.

Before you do anything else, please read this

Charge the battery
The battery in your phone hasn't been charged yet. Please use the supplied power adapter to do a full charge before you start using your phone. Also, please don't try to take your phone apart. (If you do, it may invalidate your warranty.)

Choose a rate plan wisely
Depending on how you use your phone, it can use up a lot of Internet bandwidth really quickly. Before you use your phone, we strongly recommend that you talk to your mobile operator about data rates.

Using data services while roaming will be costly. Check with your mobile operator for data roaming rates before you use data roaming.

Know about privacy laws
Some countries have strict laws about how and when you can record phone conversations. It's a good idea to find out what the laws are where you live before you use your phone's recording feature.

And finally, a few important words from our legal team (LIMITATION OF DAMAGES)
To the maximum extent permitted by applicable law, in no event shall HTC or its affiliates be liable to you, any user, or third party for any indirect, special, consequential, incidental or punitive damages of any kind, arising in contract, tort, or otherwise, including, but not limited to, injury, loss of revenue, loss of goodwill, loss of business opportunity, loss of data, and/or loss of profits, regardless of the foreseeability thereof or whether HTC or its affiliates have been advised of the possibility of such damages. And in no event shall the total liability of HTC or its affiliates exceed the amount received from you, regardless of the legal theory under which the cause of action is brought. The foregoing does not affect any statutory rights which may not be disclaimed.

Make your call

1. From the Home screen, tap **Phone**.
2. Enter the number or contact you want to call.
   Or from the list, tap a contact to call.
3. To hang up, tap **End call**.

Send a message

1. From the Home screen, tap **Messages**.
2. Tap **Compose**.
3. On the Compose screen, you can enter one or more recipients:
   - Enter the phone numbers directly in the **To** field. If you're sending the message to several phone numbers, use a comma to separate them.
   - Or tap **People**. Then select the contact's phone number to whom you want to send the message.
4. Tap **Add text** to start composing your message.
5. To include a photo, video, or other information, tap the **Attachment** icon.
6. When done, tap **Send** to send the message.

Set the ringtone & volume

Change the phone ringtone and volume to suit you.

Choosing a ringtone
1. From the Home screen, slide the Notifications panel open.
2. Tap **Settings**.
3. Tap **Personalize**.
4. Tap **Ringtone**.
5. Choose a ringtone you want to use, and tap **Apply**.

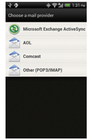
Lowering the ring volume automatically
HTC One V has a quiet ring feature that automatically lowers the ring volume when you move it.
1. Slide the Notifications panel open, and then tap **Settings**.
2. Tap **Sound.**
3. Select **Quiet ring on pickup**.

Making HTC One V ring louder in your pocket or bag
To help avoid missing incoming calls when HTC One V is in your pocket or bag, the pocket mode feature gradually increases the ring volume and vibrates when you receive a call.
1. Slide the Notifications panel open, and then tap **Settings**.
2. Tap **Sound.**
3. Select **Pocket mode**.

Set up personal email

Use the Mail app to set up and manage your personal email accounts (POP3 or IMAP) email accounts.

1. From the Home screen, tap **Mail**.
2. Select an email provider.
3. If this is the first time to add an email account in Mail, tap **Other (POP3/IMAP)**.
4. Enter the email address and password for the email account, and then tap **Next**.
5. If the account type you want to set up is not in the phone database, you will be asked to enter more details.
6. Your phone will take a minute to verify your information.
7. Enter the account name and your name, and then tap **Finish setup**.



Set up work email

You can add up to 15 Microsoft Exchange ActiveSync accounts on HTC One V.

1. From the Home screen, tap **All Apps**.
2. Sweep the screen, and then tap **Settings**.
3. Tap **Accounts & sync**.
4. Tap the **Add (+) icon**.
5. If this is your first time to add an email account in Mail, tap **Exchange ActiveSync.**
6. Enter the Exchange ActiveSync account details, and then tap **Next.**
7. Choose the type of information to sync and how often. Then tap **Next.**
8. Enter the account name, and then tap **Finish setup.**

Note: Your corporate Exchange Server must support auto-detect for the phone to automatically set up the Exchange ActiveSync account. If your corporate Exchange Server does not support auto-detect, you will need to enter your Exchange Server settings after you tap **Next**. Ask your Exchange Server administrator for details.

Set up Gmail

1. From the Home screen, tap **All Apps**
2. Sweep the screen, and then tap **Gmail**.
3. If you do not have a Google Account, tap **New** to create one. If you have an existing account, tap **Existing** to log in.
4. When you have created your account, tap **Sign in**.

Add contacts

The People app lists all contacts stored on your phone and from the online accounts you're logged in to.

1. From the Home screen, tap **All Apps**.
2. Sweep the screen, and then tap **People.**
3. Tap the **Add (+) icon** to add a new contact.
4. Enter the contact's name. Tap the **Edit** icon if you want to separately enter the contact's first, middle, and last name.
5. Tap the **Camera** icon to assign a photo to your new contact.
6. Tap **Gallery** and select a photo from an album.
   Or tap Camera to take a new photo to add to your new contact.
7. Continue to enter the information for your new contact, and then tap **Save**.

Edit contacts

1. From the Home screen, tap **All Apps**.
2. Sweep the screen, and then tap **People**.
3. Tap the contact name that you want to edit.
4. Tap **Edit.**
5. Enter the new information for the contact, and tap **Save**.

Take a photo

1. From the Lock screen or Home screen, tap **Camera**.
2. Just point the camera on what you want to capture. The camera adjusts the focus automatically and continuously refocuses as you move it.
3. When you're ready to take the photo, tap the **Camera Shutter** button.

Record a video

1. From the Lock screen or Home screen, tap **Camera**.
2. When you're ready to start recording, tap the **Camcorder** button.
3. While recording, you can:
   - Freely zoom in or out
   - Change focus to a different subject or area
   - Tap the Flash icon to turn the flash on or off.
4. To stop recording, tap the **Stop** button.

Share photos & videos

Using the Photos app, you can send photos and videos via email or MMS. You can share photos on your social networks (such as Facebook, Flickr, Picasa, and Twitter) and share videos on YouTube.

1. From the Home screen, tap **All Apps**.
2. Sweep the screen, and then tap **Gallery**.
3. Tap the album where the photos or videos you want to share reside.
4. Tap **Share.**
5. Select how you want to share.
6. Select the photos or videos you want to share, and then tap Next.
7. If you chose to share on **Facebook**, you can add a caption to your photo. You can also tag friends on your photo.
8. Tap **Upload** or **Done.**
